

## ABOUT THE BOOK

The book *Frontiers in Mechanochemistry and Mechanical Alloying* [ISBN : 97881-87053-69-8] (Rakesh Kumar, Srinivasan Srikanth and Surya Pratap Mehrotra (Eds.)) is a compilation of papers presented in the VI International Conference on Mechanochemistry and Mechanical Alloying (INCOME) held at CSIR-National Metallurgical Laboratory (CSIR-NML), Jamshedpur (India) during December 1-4, 2008 under the aegis of International Mechanochemistry Association (IMA). Fifty three papers (334 pp) included in this book are written by experts from all over the world. The content of the books are available on the link : [eprints.nmlindia.org](http://eprints.nmlindia.org)

The papers are arranged under seven sections:

- Mechanochemistry of Macromolecules and Applications in Pharmaceuticals
- Nano-particle and Nano-composites
- Advance Ceramics Science and Technology
- Severe Plastic Deformation and Friction Stir Welding

- Mechanical Alloying and Advanced Materials
- Mineral Processing and Extractive Metallurgy
- Building Materials and Environment Management.

The broad coverage of this book should make it useful to materials scientists and engineers in academic institutions, research organisations and industry.
